INSTITUTION'S ENERGY POLICY DOCUMENT

In the context of utilization of energy resource like electricity, the management consulted the faculty, non-teaching staff and student-teachers and created an awareness about the necessity of saving the electricity and use the non-conventional energy as well as natural resources like sunlight and air.

- To utilize the natural resources of light namely sunlight and air, the entire college community is trained to keep windows and doors open on either side of the class-rooms, halls and laboratories.
- To use a minimum level of air-conditioners in the conference hall and multi-purpose hall. In the event of electricity failure, we use generators.
- To pay attention the switching off the lights, fans and air-conditioners when the classes or educational programmes are not held.
- To remind at periodical intervals the usage of non-conventional energy and its impact on general health, eyes and bodily temperature.
- To educate the members of this academic institution to practice consciously the planting of trees in their homes, use of plants that promote oxygen and maintaining them regularly.
- To develop the habit to stop wastage of energy on working days students on duty keep check on computer, lights, fans whenever these are not in use and set the computer to sleep or hibernate mode when not in use.
- Regular maintenance of batteries, electricity, wires, computers, CPU, printers and other appliances have been done and sufficient finance for the maintenance is available.
- Solar energy utilized in the institution to conserve the maximum amount of electric energy.
